The Maya Civilization: Architects of a Mysterious Empire

Origins and Geographic Spread

The Maya civilization emerged around 2000 BCE in what is now southeastern Mexico, Guatemala, Belize, Honduras, and El Salvador. It reached its classical peak between 250 and 900 CE, establishing numerous city-states characterized by impressive architecture and complex societal structures. The Maya were not a unified empire but a collection of city-states often engaged in both cooperation and conflict.

Society and Political Structure

Mayan society was hierarchical, with a ruling class of kings (ajaw), nobles, scribes, artisans, and farmers. City-states were governed by a king who held both political and religious authority, often claiming divine right. Notable city-states include Tikal, Palenque, Copán, and Chichen Itza.

Achievements and Innovations

- Calendar and Astronomy: Their complex calendar systems, including the Tzolk'in and Haab', and astronomical calculations are still admired today.
- Architecture: They built towering pyramids, palaces, ball courts, and observatories, often decorated with intricate carvings.
- Mathematics: The Maya used a vigesimal (base-20) number system and independently developed the concept of zero.

Decline and Mysterious Collapse

By around 900 CE, many southern cities were abandoned, possibly due to environmental degradation, warfare, overpopulation, or drought. The northern cities, including Chichen Itza, persisted until the arrival of the Spanish in the 16th century.

The Aztecs: A Warrior Empire of the Valley of Mexico

Origins and Rise to Power

The Aztecs, also known as the Mexica, migrated into the Valley of Mexico around the 13th century. They established their capital, Tenochtitlán, in 1325 on an island in Lake Texcoco. Over time, they formed a powerful empire through conquest, alliances, and strategic diplomacy.
